BLOOD COLLECTION TUBE
HOLDER WITH NEEDLE

- Automated needle retraction
  - Provides instant safety
  - Entire needle (front & back end) is completely covered when retracted
- Allows for in-vein activation, which effectively reduces exposure to the contaminated needle
- Pre-attached needle - no assembly required
  - Prevents exposure to the back end needle
  - Improves efficiency in preparation time
- Integrated, low-profile tab provides optimal view of venipuncture site
- Easy, one-handed activation allows hands and fingers to stay behind the needle during activation
- Prevents needle removal from the holder, which is prohibited by OSHA regulations
- Single-use holder complies with safety regulations

easy to use

- Attached needle is ready to use right out of the package. No assembly is required.
- Allows for single-handed activation while keeping hands behind the needle.
- Compatible with standard blood collection vacuum tubes.

1

Perform venipuncture per protocol of institution.

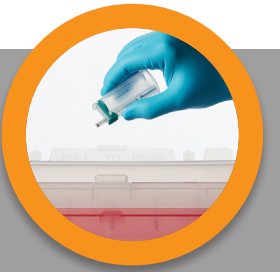
2

Once last tube has been removed from the tube holder, activate the retraction mechanism using a squeezing motion to slide the color-coded finger tab toward the clear tab.

3

Needle will automatically retract into the safety chamber, preventing exposure to the contaminated needle and rendering the tube holder non-reusable.

4



Dispose of EasyPoint® Blood Collection Tube Holder with Needle in an appropriate sharps container per protocol of institution.
